I am applying for the position of AI Engineer Intern at your company. With strong technical and algorithmic thinking, along with a quick ability to learn new technologies, I have a deep passion for technology, especially Artificial Intelligence.

I look forward to the opportunity to work and contribute to the company, striving to learn from a professional environment, gain practical experience, and gradually develop my expertise.

My goal in the next 3-4 years is to become a solid AI Engineer with strong foundations in programming, data processing, and machine learning model deployment. I aim to participate in real-world AI projects to build, train, and deploy AI models, progressing toward a specialized role in Artificial Intelligence.

EDUCATION

Hanoi University of Industry
Computer Science
08/2021 - 09/2025

CPA 3.2

AWARD

Developed a sentence completion support model using GPT-2.

Built a driver drowsiness warning system using K-means.

Diabetic Retinopathy Diagnosis on Fundus Images Using Deep Learning ResNet Model
https://github.com/Huypluie/Huy/tree/develop

An NLP-Based System for Assessing the Match Between CV and JD

SKILL

Operating Systems
Window, Linux

Programming Languages
Python, C++, C#, Javascript

Service
Pytorch, Tensorflow, Hugging Face, Ollama, LangChain

DevOps Tools
Git

CERTIFICATION

EXPERICENCE

HEXAGON Co., Ltd
